AT HOME

Few places are as important as your own home. Your world, your space, your place, your life. Sleep easy with our access control system, confident that your home is safe from unwanted visitors. Your privacy and no surprises.

Imagine walking into your home and disarming the alarm and opening the door with a single gesture. Arriving home from work, the garage door opening as you approach, with no need for remote controls. The garden door, front door, garage door or annexes to the main house, the cellar, dressing room or main bedroom.

Forget keys, copies and all their drawbacks. State-of-the-art biometric readers mean you will never forget your keys again, because you are the key. There's no need to make copies of keys for domestic employees, with all the risks that entails. With **NÜO Go!** everything is under control. You decide who can enter each area of your home and grant or revoke permission in real time from any computer, smartphone or tablet. Problems with an employee? Revoke their authorisation automatically. It's so easy you won't even need instructions.

A new world of possibilities that will tell who entered, where and how long they stayed and who tried to gain unauthorised access or access outside their assigned time frame while you were away.

NÜO Go! adapts to your needs How many doors do you need to control? One, three, seven? We have the perfect solution for you to manage who enters and leaves the different rooms in your home.

nüo Sky

The most beautifully-designed, hard-wearing video-intercom system

Monitor your home
wherever you are

With NÜO Go! you control who has access to your home even when you are out. It's as easy as logging onto to a web page with your smartphone, tablet or computer from anywhere in the world.

Its minimalist design can be integrated in any kind of environment without altering it at all. We offer you a wide range of terminals so you can choose those that suit you better: embeddable or for surface installation.

Say goodbye to keys!

Video-intercom

See who's calling

An exclusive video-intercom welcomes visitors and connects you to the outside of your home any time. You get a perfect view of who is outside and can have a clear conversation thanks to our sophisticated technology.

The video console indoors allows you to maintain a hands-free conversation, or use the light wireless earpiece. Goodbye tangled messy cables. Open, lock or give unrestricted access to doors, get alarm notifications using the high resolution touch screen.

NÜO Go! makes it easy for you. No dedicated computer, no dependence on third parties, no software licences and no unforeseen costs...

No complications or commitments!

Web APP

All on one screen Just a click away

One of the best things about NÜO Go! Is that it's so easy to use.

You can create users and assign permissions on one screen, set up groups with common characteristics, capture fingerprints, grant special permission, unblock doors or arm or disarm the alarm.

The app is so easy to use that you won't need instructions. The system automatically locates all your installed devices. All you need to do is name the doors.

The system and devices update automatically and the service is free for life. All you need to do is decide who to allow into your home, at what time, and in which specific areas. Peace of mind and protection from intruders.

Everything is totally intuitive and takes effect immediately

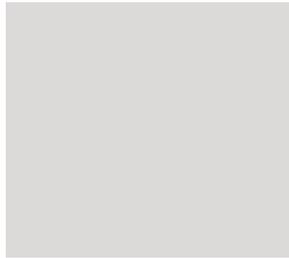

Security for your home's sensitive areas >

Not all parts of the house need the same protection. That's why NÜO Go! offers different security levels according to your needs.

The common rooms have free access for everyone, but those spaces that specially concern you due to privacy or security, can be protected by requiring a double credential wether fingerprint or card so that you can stay fully confident.

In this way you make sure that it is just you who will be able to come into the larder, to open a cupboard or any drawer, to come into the main dressing room or into any other room considered of special regard.

We have a reader for every need: fingerprint and card readers, indoor and outdoor, wireless or with cables, with touch screen display, specific attendance reader with different types of installations and technologies.

Rain, snow, exposure to the sun and salty conditions, our outdoor range will always look as good and work as well as it did when you installed it.

The most comprehensive range on the market

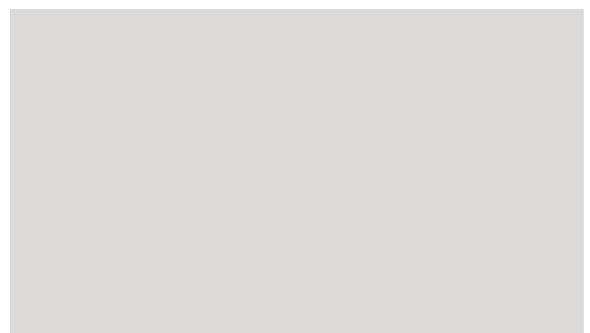

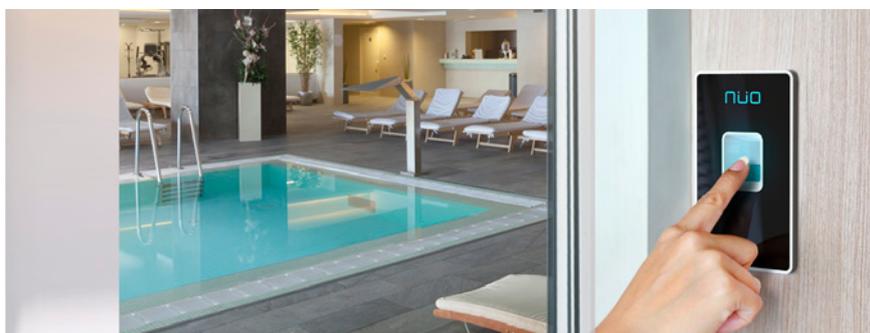

RATING IP67

The definitive solutions for villas at the beach and in the countryside

You will be able to know anytime who and at what time has come into and has left your home, who remains inside it and in which rooms he/she has been and even who has tried to come into the house without authorization. NÜO Go! includes powerful features that will allow you, among many other things, to generate custom reports by users, doors, time-slots, or events. You will have full control on hand.

Any unforeseen event? A failure, an unexpected visit, a special delivery? You can give special authorizations wherever you are. You can also unlock the door you want, connect and disconnect the alarm... Everything can be made from your computer, smartphone or tablet. **It is that simple. It is that effective.**
