IN SMALL AND MEDIUM SIZED INDUSTRY

The simplicity you've been searching for

NÜO Go! is a comprehensive access control system designed to ensure maximum security on industrial premises. A system that adapts to your needs, covering up to 20 doors with up to 250 users.

You won't believe the flexibility and scalability of **NÜO Go!** adapts to you and grows with you. Start with one, two or three doors and add up to a total of 20! doors. All you need to do is add terminals: no software licences, no third-party involvement, no unforeseen expenses, no commitment, NO COMPLICATIONS.

There's never been such a simple-to-use access control system. It almost configures itself, the most intuitive interface and user-centric menus ever. **NÜO Go!** combines the security and functionality of a great system in a way that is surprisingly easy to use. It's so intuitive that nothing gets forgotten, because there's nothing to learn in the first place.

NÜO Go! is designed with the characteristics and conditions of industry in mind; extreme hot or cold conditions; high noise levels; air currents; steam; vibrations... it's ready to work correctly in extreme conditions.

The best industrial security system on the market.

Designed to perform in extreme conditions

nüo Sky

Equipment designed for intensive use in extreme environmental conditions. Outdoor access control for vehicles and pedestrians.

nüo W&M

The most beautifully-designed, hard-wearing video-intercom system

nüo Sky

Flush, surface mounted or on a post fixed to the floor

← BUILT TO BE TOUGH!

The entire range of NÜO **Go!** components undergoes tests to guarantee they can stand up to extreme conditions.

We manufacture in stainless steel, aluminium, magnesium and ultra-tough tempered glass. Throughout the years, our equipment will always look perfect and be maintenance-free.

BESPOKE SECURITY SOLUTIONS

Everything under control

Employee access from outside, vehicle entry and exit from the company car park and loading and unloading bays, administration areas and reception, raw materials warehouses, production centres and workshops, laboratories, hazardous materials storage areas, restricted access zones, offices, server rooms... Endless types of industrial premises, each with their own security needs.

That makes **NÜO Go!** the ideal system for quick, coherent coverage of different access control requirements.

There are specific security functions for areas requiring maximum protection, such as supervisor mode, which requires two user-authentication credentials to access a specific area.

VIDEO + AUDIO + ACCESS

All-in-one system!

Industrial premises need security management and communication between different areas and doors. NÜO Go! is an all-round solution: a unique integrated management system. There's no distinction between access control and the video-intercom. No complications. All in one! The **NÜO Sky** range incorporates a biometric

or card reader for employees, and a sophisticated video-intercom system for visitors, with perfect audio and video quality. It also incorporates independent video-intercoms for installation in strategic spots for emergency use or to ask for help: laboratory areas, warehouses or dangerous waste, intensive work areas, etc

READERS

The most comprehensive range on the market.

No more “one-size fits all”! We have a reader for every need: fingerprint and card readers, indoor and outdoor, wireless or with cables, with touch screen display, specific attendance reader with different types of installations and technologies.

Select the right reader for each zone.
With NÜO Go! everything is combined in the same system.

RATING IP67

The state-of-the-art multi-spectral technology featured in NÜO AWA captures sharp images of the deepest layers of the fingertips, correctly recognising difficult, dirty, damaged, dry, wet and worn fingerprints. This stops access with fake fingerprints.

The easiest app to use, ever. It features an incredibly powerful, intuitive interface which is accessible from any device: computer, tablet or smartphone. It's so easy to authorise users and set security conditions for each door with our system.

You decide who comes in, when and where. Establish security profiles, include user groups with shared characteristics, manage limited access to sensitive areas and set each employees work hours and time off. All just a click away! What's more, you'll always know if someone has tried to gain unauthorised access. Revoke user access in real time.

Configuring NÜO Go! is child's play. It automatically detects your devices, and all you have to do is name the doors. So easy you'll understand everything. You won't even need user instructions and updates for the application and devices are free forever and automatic with the web application. It couldn't be easier!
